CS 1380: Modern Programming Essentials

New Course | Fall 2026 | 3 Credits

Replacing CS 2370

Provides a solid foundation in programming while introducing essential development tools and practices for beginner programmers.

Prerequisite: Mathematics at least equivalent to college algebra

What You'll Learn

-Modern C programming (not C++)
-Programming "survival" skills like debugging, git version control, etc.
-Using the modern command line terminal effectively
-Apply programming concepts to solve real-world problems

Who Should Enroll

-Computer Science
-Electrical and Computer Engineering
-Any major that requires CS 2370

UVU™
